Share your dream

Wentworth students are action-oriented and career-minded. They leave here well on their way to professional success. Our goal is to give you the knowledge, advice, tools, and co-ops you need to navigate your future.

OUR GRADUATES WILL BE THE FIRST TO TELL YOU ...
YOU CAN MAKE IT HERE.
Maybe you’re a builder, an inventor, a tinkerer, or a troubleshooter who enjoys rolling up your sleeves to find solutions. You’re the kind of person who would like to help the world work better. Wentworth doesn’t pretend to be all things to all people. We are a school designed for people like you.

WELCOME HOME.
Celebrating what makes you you

We create spaces, events, and celebrations that bring members of the community together to promote a deeper understanding of issues related to culture and identity. At the end of the day, we are at our best when every member of our community can be their authentic selves.

Whenever I interview for a position, I feel calm and confident because I know I’m ready. The team at Co-ops and Careers prepares you for every twist and turn. You know exactly what to expect. Go there as soon as you arrive on campus. You will have a dedicated team working closely with you for all your years here. This level of support is Wentworth’s best kept secret.”
When Professor Yetunde Folajimi announced the assignment—create an app that illustrates everything you’ve learned so far in Computer Science—Jadon Watson immediately thought about the pandemic. How could he use this opportunity to make something other than the usual game app? “Why do something silly,” he thought, “when I can do something amazing, something meaningful?” He decided on a social distancing app, recruited classmate Kyle Meade ’24, and the two pooled their know-how. The project was deeply complex, but in the end, it worked exactly as he had envisioned it. “For me—somebody who likes to make things happen—Wentworth has been a dream school.”
Wentworth gives you everything you need to forge a highly rewarding life in your chosen field. That includes hands-on experience with the latest tools and techniques, strong support systems, and access to professional networks. Business courses broaden your skills and give you the versatility you need to take on any challenge.
The Wentworth Co-op Commitment

Wentworth co-ops are paid, semester-long job experiences in your field that give you the chance to test-drive your chosen career. Two full-time co-ops are built into the curriculum for every undergraduate—some students opt for three. Employers are eager to hire Wentworth grads because they have already proven themselves as experienced professionals.

But co-ops aren’t just a simple job placement. At Wentworth, we

• coach you through your co-op job searches and interviews
• show you how to apply your latest knowledge in a professional setting
• help you earn a full-time salary during your co-op
• provide access to some of the most prestigious companies in your field and establish contacts there

10,000+ co-op placements for students over the last 7 years
Her father and grandfather were builders, so Abby Trainor grew up on residential construction sites. As early as her sophomore year in high school, she’d set her sights on Wentworth’s Construction Management program. Once she arrived on campus, she hit the ground running, serving as the CM Club president during her very first year—an influential position at Wentworth and in the CM community. Abby’s first co-op was on a submarine dry-dock at the Portsmouth Naval Shipyard, an incredible opportunity for federal government experience. Her next co-op offered another pivotal role—working on major terminal renovations at Boston’s Logan Airport. “Choose a career that makes you joyful,” she says. “For me, that’s construction.” Abby has already accepted a job with Shawmut Design and Construction to begin work when she graduates next year.

“I’ve had incredible networking opportunities through Wentworth, including connections to top industry leaders like Christine Keville, CEO of Keville Enterprises. It’s women like Christine who push me to accept any challenge that comes my way as an opportunity for growth.”

Learn more about Abby’s story
As a Wentworth graduate, you will find yourself in high demand for positions that require technical, collaborative, and leadership skills. The curriculum, the co-ops, and the hands-on experiences deliver all of that, as does our extraordinary network of support systems.
Your Support Network

- **Student Success Advisors**—assist with schedules, academic plans, and tutoring
- **Wentworth’s Center for Wellness**—merges physical and mental health services holistically
- **Women@Wentworth**—creates experiences, opportunities, and scholarships for Wentworth women
- **Center for Diversity and Global Engagement**—supports students and invites the community to celebrate other cultures

The result of this multi-tiered network? Our alumni are working in their dream jobs at top companies around the world.

Growing up, Sabrina Lorica was obsessed with treehouses. That passion convinced her that architecture was her true calling. When the time came for college, Sabrina decided to study in Boston, a city known for its iconic architecture. Of all the schools in the area, she chose Wentworth for its co-ops and for its 4+1 program—an undergraduate and a graduate degree earned in five years. One of her co-ops? Designing treehouses in Colorado, where she worked with one of the country’s most talented treehouse architects. Sabrina has since moved on to buildings of a grander scale and an internship with a prominent architectural firm, but she will never forget her first love.

“I mentioned to Michael Mozill, my business professor, that a major treehouse company was hiring. He said, ‘Hang up and call them now!’ I ended up spending several months working with some of the most talented names in treehouse design. I was star struck but also learned so much about the process of architecture.”

Learn more about Sabrina’s story
Wentworth students, regardless of major, are drawn to our innovation and entrepreneurship center, Accelerate. Here, they move their ideas forward, whether they’re working on a classroom project, launching a new business, or getting an invention off the ground. To help advance those ideas, Accelerate has staff, faculty, and industry partners from different disciplines ready to meet one-on-one, offer guidance, and share their own personal stories. Just walk in. Your input, ingenuity, and imagination are always welcome.
8,500+ students have participated in Accelerate projects and events since the center opened a decade ago.

**The PDB Foundation Entrepreneurial Co-op**

One of Wentworth’s most exciting entrepreneurship opportunities is the PDB Co-op Experience. As a senior, you could spend your fall semester working exclusively on a business idea of your own design. If accepted into the program, you will receive up to $11,500 in funding as well as guidance from faculty and industry experts to start a venture you feel passionately about.

**MADE IT HERE!**

Just as Trey Pierce was about to begin the graduate year of his 4+1 program in Electromechanical Engineering, he was offered a management role at a robotics company. It was an abrupt—but exciting—change of direction that all started when he tackled a class robotics project in Wentworth’s Accelerate Makerspace. The project turned into a co-op with Wentworth alumnus Mike Santora ’05, CEO of LOGIC, during which Trey helped create the motion-control function of a robotic semi-autonomous pallet. That co-op then turned into his new role as mechanical lead at LOGIC, where Trey will streamline the robot, an invention that could revolutionize the shipping industry.

“Accelerate is not just an incubator for projects. It’s a place where people break down barriers and build friendships and networks. It’s a melting pot for people and ideas. It’s where I learned how to be myself...in the very best way possible.”
The Wentworth curriculum is grounded in future-focused learning for high-demand careers. You will have access to the latest and most crucial knowledge relevant to your profession, and you will put it into action in classrooms, labs, studios, maker spaces, leadership roles, and out in the field. Wentworth’s diverse and engaging faculty, all experts in their disciplines, are dedicated to teaching and mentoring. At Wentworth, student success is the top priority—always.

Learn about your wide range of options for minors and concentrations
It all started with a high school robotics class—a class Jenah Arsenault took only because she needed to fulfill a computer credit. In the end, she liked the course so much, the teacher recommended she consider an engineering career. “I started looking at different engineering fields,” she remembers, “and when I read about designing the infrastructure for cities of the future, I knew that civil engineering was it. At Wentworth, my favorite co-op has been producing a schematic design for a carwash. It covered so many aspects of civil engineering, and I loved every minute of it. That’s the beauty of a co-op—find out if you really love what you plan to do.”

“When you come here, you jump right into your major from the get-go. Wentworth is career-oriented, so everything you learn is relevant to your future. Right from the start, you are prepared for the real world—but you have a lot of fun in the process.”
We believe in getting you out of the classroom and into the labs and studios. Every Wentworth student has access to the more than 60 labs and studio spaces on campus, including our new AI and Robotics Lab. Design majors have their own studio space, and everyone is welcome to use the high-tech equipment in our Accelerate Makerspace—no matter what you happen to be studying. This is your chance to collaborate with peers, faculty, and industry partners to make your ideas real—and amazing.

CASSIDY HAYES ’21

BIOLOGICAL ENGINEERING

With the help of professors, mentors, and advisors, Cassidy Hayes customized her Wentworth experience to fit her goal—medical school. Her co-ops plunged her into the frontlines of COVID treatment centers during the height of the pandemic. Back in the labs at Wentworth, she conducted significant research on the connection between diet and the progression of Parkinson’s disease—a project she designed with two other students. Now in medical school, Cassidy says that Wentworth gave her a perfect foundation for pre-med. “With so many courses in advanced sciences, I was able to build a solid understanding of the molecular fundamentals of medicine. Most important, I learned critical thinking, which is at the root of it all.”

“...I really found my happy place in the labs. The professors treat students as respected researchers and give you the freedom and flexibility to create your own project and go for it. I learned so much—and made so many friends!”

Learn more about Cassidy’s story
From e-sports and gaming tournaments to the Solar Decathlon and Formula 1 racing car clubs, extracurricular activities at Wentworth are serious fun. If you’re into athletics, you’ll find 16 NCAA Division III varsity sports and many intramural opportunities—and we just broke ground on a new $55M athletic complex set to open in Fall 2024. You also are just steps away from the great food, music, theater, art, and other attractions that make Boston a prime destination for college students.
A rich campus life
Wentworth is all about balance. Our comfortable, 31-acre campus offers a tree-lined quad, amenity-rich residence halls, a brand-new dining commons, and a sense of shared community. Step out onto the sidewalk, and you are in the center of one of the most vibrant cities in the world. Students say Wentworth could not be better situated for professional and recreational opportunities. Best of all? You are guaranteed housing all four years.

Good Sport
Boston is an iconic sports town, and Wentworth plays its part with 16 NCAA Division III men’s and woman’s varsity sports.

“Our studio spaces are so impressive. Shop after shop— for designing furniture, toys, jewelry…. Shelves of fabric, foot molds, lathes. Couches where you can hang out and chat or brainstorm. Studio desks with wonderful ideas tacked up all over. Even the bathroom is covered in inspirational post-its. That’s the ID vibe.”

Eva Cloostermans was a serious vocalist. She even sang for the Grand Duke and Duchess of her native Luxembourg. But when she had to choose a career, she opted for another interest—industrial design. “I realized I could still sing as an industrial designer, but I couldn’t do industrial design as a singer.” Eva was drawn to Boston because it’s similar in size and international feel to her home country. She was drawn to Wentworth because of the facilities—and the sense of community. “I plunged right in,” she says, “helping to start a club for women in Industrial Design called Frauhaus.” The club provides networking opportunities and support systems for women in ID. “Frauhaus is helping us soar in what used to be a male-dominated field.”
We’re looking for students who fit Wentworth—and for whom Wentworth fits. We are a college for thinkers and doers. For students who want to put new ideas into practice and have fun doing it. For those who want to make an impact and for those who are looking for new adventures. Our curriculum, our culture, and our community are designed to make you successful. Bring your passions and your strengths to Wentworth, and make it yours.
Colleges of the Fenway

The Wentworth community is actually five-schools wide. The Colleges of the Fenway includes five higher-ed institutions, 2,300+ course offerings, 700+ faculty, and 12,000+ undergraduates attending college in Boston. You can take courses at any of these schools but also participate in events, block parties, and intramural sports.

“Best Value Schools” and “Best Regional Universities” in the North (U.S. News and World Report 22-23)
“One of the biggest advantages of being at Wentworth is how connected you are to other colleges. I hang out and collaborate with students all across Boston. This network has shaped a big part of my college experience. Believe me, it’s a vast opportunity to tap.”
Inspired by controversies around natural hair, Manny Chalumeau ’22 and a group of friends started Watch the Krown, a shopping site for natural hair products. It’s also a cultural hub that encourages Black women and men to artfully celebrate their “Krows.” Manny sees Wentworth as a basecamp for Boston. In addition to the ample support he’s found at Wentworth’s Accelerate incubator, he’s very plugged into the greater Boston community—winning a chunk of funding from an MIT pitch competition, for example, and speaking on a panel at a nearby university. “You have the benefit of big and small at Wentworth, an intimate school set in a big city where a lot is happening. It’s the best of all worlds.”
You can afford Wentworth.

More than 80 percent of all Wentworth students receive some form of financial aid. We’ve also streamlined the process as much as possible. In fact, all admitted students are automatically considered for merit scholarships—no separate application necessary.
